Digital Voice Systems	www.digital-voice.com	Joni Guion	jonig@digital-voice.com	877-387-6525	For 40 years Digital Voice Systems, Inc. has been the Southeast's leading provider of Voice Processing and Document Distribution systems in the Medical market. We specialize in dictation, transcription and speech recognition technologies that increase productivity and improve patient care. Our newest product offering is Fusion CAC, a computer assisted coding product that increases the efficient and consistency of coding for both inpatient and outpatient charts. Fusion CAC uses natural language processing (NLP) and exclusive algorithmic software to electronically analyze the entire medical charts in order to pre-code both CPT and ICD9 diagnostic and procedural nomenclatures. The pre-coded results from Fusion CAC are presented to Coders who then confirm or amend the results. This automated process can improve the Coder's productivity by as much as 80% which translates directly to a reduction in the time between the patient's discharge and revenue capture.
