

is proud to announce the
following strategic educational alliance for 2008-2009

For more than 15 years, Health Information Associates (HIA) has been committed to quality in everything we do, from the training of our staff, to relationships with our clients. As a result, we've become a leading provider of coding and review services for hospitals nationwide.

That success has allowed us to focus on something else that we're equally dedicated to: the communities in which we live and the profession in which we work. We strive to do everything we can to promote, support and lead the coding profession to ever-higher standards of quality.

This year HIA is pleased to be the proud sponsor of the 2008-2009 SCHIMA coding roundtables. In order to continue with the advancement of our profession, HIA will provide funding to defer the significant costs associated with establishing and delivering these award winning sessions.
